

Job Description for Backend Software Developer

About the Company

[Sprih](http://www.sprih.com) (www.sprih.com) is a technology-focused start-up that is catalyzing climate action through its carbon management and accounting platform. Sprih partners with organizations on their sustainability journey by offering meaningful insights and the necessary support to make the right decisions towards achieving their net-zero goals.

Sprih's unified platform offers various tools for efficient carbon management, like carbon emissions and offset analysis, supply chain emissions management, setting science-based targets, providing actionable recommendations for reductions and offsets, streamlined disclosures and ecosystem partner collaboration.

Come and become part of a passionate, driven, and action-oriented team, led by seasoned entrepreneurs to craft tomorrow's climate tech!

Job Description

We are seeking a self-driven and motivated Backend Software Developer to join the development team at Sprih.

In this role, you should be a team player with a keen eye for details and problem-solving skills. Your goal will be to build efficient programs and systems that scale well with the user load.

Responsibilities

- Work with team to design algorithms and flowcharts
- Produce clean, efficient code based on specifications
- Integrate software components and third-party programs
- Verify and deploy programs and systems
- Troubleshoot, Monitor, debug and upgrade existing software
- Gather and evaluate user feedback
- Recommend and execute improvements
- Look for improvement in engineering efficiency
- Create technical documentation for reference and reporting
- Keep abreast of developments in the field

Requirements

- Bachelor's or Master's degree from top tier institutes.
- 2+ years of experience as a Backend Software Developer.
- Proven experience as a Software Developer or similar role
- Understanding of data structures, data modeling and software architecture
- Deep knowledge of math, probability, statistics and algorithms
- Ability to write robust code in Java.

- Excellent communication skills
- Ability to work in a team
- Outstanding analytical and problem-solving skills
- Attention to details.

If you meet the above requirements and are passionate about building large scale software, we would love to hear from you. Please send your resume to **hr@sprih.com** along with your portfolio for consideration.
