Professional Summary

Backend Software Engineer with 1+ year of experience building scalable, cloud-native microservices using Java and Spring Boot. Experienced in REST API development, Kafka-based asynchronous processing, Docker containerization, and Kubernetes deployments with a strong focus on automation, reliability, testing, and clean architecture.

Experience

Backend Software Engineer, Tata Consultancy Services – Noida, Uttar Pradesh January 2025 – Present

- Developed backend **REST APIs** using **Java**, **Spring Boot**, and **PostgreSQL** to support core product features and improved API response times by about **25%** through **query optimization**.
- Worked on a **microservices-based architecture** using **Spring Cloud**, enabling **independent service deployments** and reducing feature release turnaround time by nearly **20%**.
- Improved application responsiveness by implementing **Redis caching** for frequently accessed data and using **Apache Kafka** for **asynchronous background processing**.
- Managed **environment-specific configuration** using **AWS AppConfig** and implemented **AWS S3** for storing and retrieving **application files**.
- Wrote **unit and integration tests** using **JUnit** and **Mockito**, maintaining around **80% test coverage** and reducing production defects.
- Containerized Spring Boot microservices using **Docker** and deployed them on **Kubernetes** clusters for development environments, ensuring consistent builds and cloud-native deployment workflows.
- Collaborated with **product managers**, **QA**, and **engineers** in an **Agile/Scrum environment**, participating in **sprint planning**, **code reviews**, and **feature discussions**.

Projects

Bank Matrix Bank Matrix-Github Repo

- Built a **banking application** using a **microservices-based architecture** with **4 services**, allowing independent development and easier scaling of application components.
- Implemented **service discovery** using **Netflix Eureka** and centralized routing through an **API Gateway**.
- Secured application workflows using **JWT-based authentication** and **role-based access control (RBAC)**.
- Developed a responsive frontend using **React** and **TypeScript**, improving page load performance by around **20%**.

Achievements

- Solved **1000+ coding problems** across multiple competitive programming platforms including LeetCode and GeeksforGeeks.

Technical Skills

Languages & Backend: Java, SQL, Spring Boot, Spring Cloud, REST APIs, Microservices, JWT, Kafka, Redis

Databases: PostgreSQL, MySQL, MongoDB

Fundamentals: Data Structures & Algorithms, OOP, Distributed Systems, RDBMS, CI/CD, SDLC

Tools: Git, GitHub, GitLab, Jenkins, Docker, Kubernetes, Ansible, Postman, SonarQube, Prometheus, Grafana, ELK Stack, AWS (S3, AppConfig)

Education

Chandigarh University, B.E. in Computer Science and Engineering

August 2020 – July 2024

- CGPA: 7.81/10.0
