Professional Summary

Backend Software Engineer with 1+ year of experience building scalable, secure, and high-performance backend systems in Java and Spring Boot. Currently contributing to GeM 2.0, delivering low-latency REST APIs and microservices focused on performance optimization, reliability, testing, and clean architecture.

Experience

Backend Software Engineer, Tata Consultancy Services – Noida, Uttar Pradesh January 2025 – Present

- Developed **low-latency RESTful APIs** in **Java**, **Spring Boot**, and **PostgreSQL** for business-critical workflows; reduced average response time by **~30%** through query optimization and efficient API design.
- Architected independently deployable **microservices** via **Spring Cloud**, enabling **horizontal scalability** and **fault isolation** while shortening release cycles by **~25%**.
- Increased system throughput and availability by adding **Redis caching** for frequently accessed data and leveraging **Kafka-based asynchronous processing** to decouple synchronous flows.
- Resolved critical issues reported by **Fortify** and **SonarQube**, improving application security and maintaining compliance with **secure coding standards**.
- Established centralized configuration management through **AWS AppConfig** and integrated **AWS S3** for reliable file storage, ensuring environment-specific consistency.
- Created comprehensive unit and integration test suites in **JUnit** and **Mockito**, reaching **~85% code coverage** and lowering production defects and regressions by **~40%**.
- Worked closely with product managers, QA, and engineers in an **Agile/Scrum environment**, contributing to **design reviews, code reviews, and sprint planning** to meet delivery timelines.

Projects

Bank Matrix Bank Matrix-Github Repo

- Built a **distributed banking system** based on a **4-microservice architecture**, enabling independent scaling and accelerating development velocity by **~60%**.
- Integrated **service discovery** through **Netflix Eureka** and centralized request routing via an **API Gateway**, achieving **~99.9% uptime** and improved fault tolerance.
- Implemented secure workflows through **JWT-based authentication** and **role-based access control**.
- Delivered a responsive frontend in **React** and **TypeScript**, enhancing client-side performance and reducing page load time by **~20%**.

Achievements

- Solved **1000+ coding problems** across multiple competitive programming platforms.

Technical Skills

Languages: Java, SQL

Backend: Spring Boot, Spring Cloud, REST APIs, Microservices, JWT, Kafka, Redis

Databases: PostgreSQL, MySQL, MongoDB

Fundamentals: Data Structures & Algorithms, OOP, Distributed Systems Basics, RDBMS, CI/CD, SDLC

Tools: Git, GitHub, GitLab, Jenkins, Postman, SonarQube, AWS (S3, AppConfig)

Education

Chandigarh University, B.E. in Computer Science and Engineering

August 2020 – July 2024

- CGPA: 7.81/10.0
