EDUCATION

B.E. in Computer Science Engineering, Chandigarh University
Grade: 7.9 C.G.P.A.

2020 - 2024

SKILLS

Languages: Java, SQL, TypeScript
Frameworks: Spring Boot, Spring Cloud, React.js
Technologies: Microservices, Apache Kafka, Redis, Event-Driven Architecture
Cloud: AWS (S3, AppConfig)
DevOps & Tools: Docker, GitLab, Jenkins, Swagger, SonarQube, Postman
Concepts: REST API Design, OOP, Scalability, Distributed Systems, Agile

EXPERIENCE

Backend Developer

Tata Consultancy Services

Dec 2024 - Present

Noida, Uttar Pradesh

- Built a Kafka-based Notification Engine using Spring Boot to process 5M+ Email and SMS notifications daily across distributed services.
- Engineered and deployed 5+ Spring Cloud microservices enabling independent service releases and reducing production downtime by 30%.
- Implemented Redis caching and Kafka-based asynchronous job processing to improve API response time by 40% under high-volume traffic.
- Designed scalable event-driven workflows using Kafka producers and consumers to ensure fault-tolerant notification processing at 5M+ daily throughput.
- Managed AWS AppConfig environments and integrated AWS S3 for media storage, improving file retrieval speed by 20%.
- Developed 1000+ unit and integration test cases using JUnit and Mockito achieving 90% test coverage and enhancing production stability.
- Resolved 100+ security vulnerabilities identified by Fortify and SonarQube ensuring secure production deployments.
- Delivered production-ready backend features across 15+ Agile sprint cycles in cross-functional teams.

PROJECTS

Bank Matrix

Developed a microservices-based banking platform using Spring Boot with Netflix Eureka, API Gateway, JWT-based RBAC authentication, Feign for inter-service communication, PostgreSQL, and a responsive UI using React and TypeScript; containerized services using Docker. ([Github](#))

Distributed API Rate Limiter

Built a distributed API rate limiter using Spring Boot and Redis implementing the Token Bucket algorithm via Lua scripting to enforce per-user request limits across multiple service instances with atomic request processing. ([Github](#))

ACHIEVEMENTS AND CERTIFICATIONS

- Achievements: Solved 1000+ coding problems on [LeetCode](#) and other coding platforms.
- Certifications: AWS Certified Solutions Architect – Associate ([Verify Here](#))
